

Matthew Micklewright

Address: **26 Alison Street, Lincoln, LN1 1PX**

Phone: **07973367697** Email: matthewmicklewright@gmail.com

Personal Profile

A confident individual with a strong initiative, I am comfortable to conceptualise an idea and thoroughly pursue it to a completed project, as evidenced by my self-directed work and academic experience. Enthusiastic in tackling any challenges and easily adaptable to a variety of tasks and fields

Education

University of Lincoln: 2017 - Present

BSc Computer Science (1st Class (expected from average of 83% in first year)), Relevant modules include (among others):

- Object Oriented Programming
- Programming and Data Structures
- Human Computer Interaction
- Database Systems

The Long Eaton School Sixth Form: 2015 - 2017

A level Mathematics, Computer Science and Physics (BBC)

The Long Eaton School: 2010 - 2015

10 GCSEs (A* to C) including Maths, English, Sciences and Computer Science

Skills

- Proficient with C++, C# & VB.Net as evidenced by their use in University modules and my own projects.
- Prior experience also with HTML, CSS, JavaScript (jQuery), MySQL and Python
- Ability to pick up any new language(s) if needed in a short space of time
- Understanding of software development cycle and ability to direct a project, as shown by my own projects currently in various stages of development
- Team working, developed through group working modules at university (average of 93%) as well as work with various bands, orchestras, scouting groups and a variety of other team-based activities.
- Communication with clients when developing a system as evidenced by the successful development of the Newtonian Gravity Simulator
- Organisational skills developed through self-directed study at university as well as running large activities for scout groups

Experience

Self-Directed Projects

- 2D Animated Newtonian Gravity Simulator written in VB.Net, to help GCSE students visualise gravitational motion
- A game to help young children learn the alphabet, prototyped with C# but with plans to create an android app
- System utilizing a Raspberry Pi which assists in caring for an elderly relative by allowing remote control of devices (Television) and allowing video calling without input from one end

Workplace Experience

A weeks experience both with PKF Cooper Parry Ltd and Nationwide

Other

- History of volunteering in the church and wider community
- Playing at gigs with bands and ringing church bells for weddings
- Some experience of unpaid tutoring for Programming, Maths and Physics

Interests

- Music: Played a range of brass instruments for many years in a variety of bands and orchestras, providing excellent teamworking and leadership skills when leading a section and is a strong confidence builder when playing solos or features.
- Bell Ringing: ring the bells at various churches for weddings, funerals and other services. Working in a team and often leading/ instructing during practices and conducting methods
- Scouting: Attended international Jamborees as staff doing a variety of work, experience also in archery instructing and planning general activities for a unit.
